

The Edinext colour palette: codes, roles, scales and combinations for print and digital communication.

# Colour Palette

COLOUR

# Primary colours

Edinext Blue and Edinext Green come from the logo. Green is an accent colour: never use it for text.

## Edinext Blue

Logotype colour. Links, primary elements, charts.

HEX    #0076B9  
RGB    0 · 118 · 185  
CMYK   100 · 36 · 0 · 27

## Edinext Green

Colour of the X. Accent only: dots, marks, details on dark backgrounds.

HEX    #81B736  
RGB    129 · 183 · 54  
CMYK   30 · 0 · 70 · 28

COLOUR

# Neutrals

Neutrals build most surfaces and text, leaving room for the brand colours.

**Ink**

Text, headings, primary buttons.

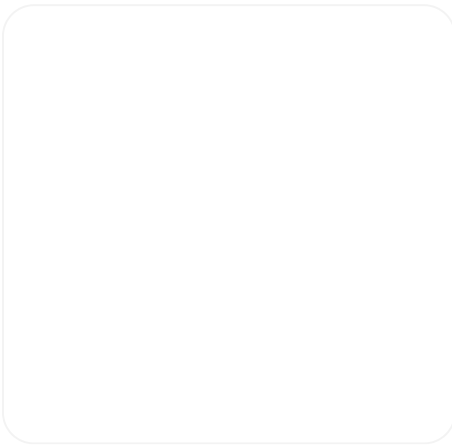

HEX    #0B1220  
RGB    11 · 18 · 32  
CMYK   66 · 44 · 0 · 87

**Night**

Dark surfaces: diagrams, footer, covers.

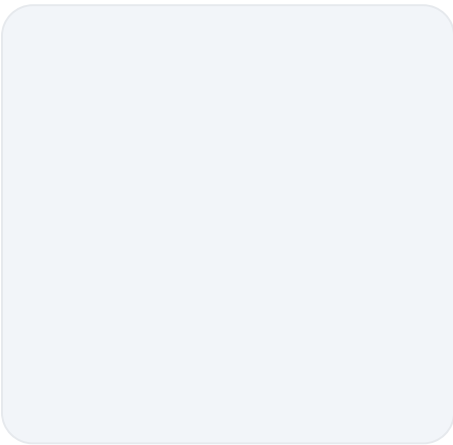

HEX    #07101D  
RGB    7 · 16 · 29  
CMYK   76 · 45 · 0 · 89

**White**

Main background.

HEX    #FFFFFF  
RGB    255 · 255 · 255  
CMYK   0 · 0 · 0 · 0

**Mist**

Secondary backgrounds and alternate sections.

HEX    #F2F5F9  
RGB    242 · 245 · 249  
CMYK   3 · 2 · 0 · 2

**Line**

Rules, borders, dividers.

HEX    #E3E8EF  
RGB    227 · 232 · 239  
CMYK   5 · 3 · 0 · 6

**Slate**

Secondary text, captions, labels.

HEX    #5A6679  
RGB    90 · 102 · 121  
CMYK   26 · 16 · 0 · 53

COLOUR

# Support colours

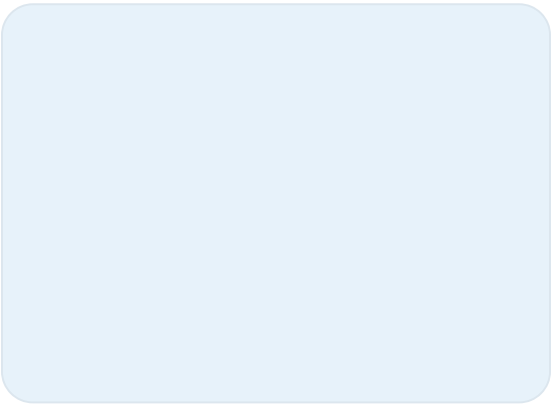

Functional variants for digital interfaces: accessible coloured text, soft backgrounds, error messages.

**Text blue**

Links and blue text on light backgrounds (AA contrast).

HEX    #005D94  
RGB    0 · 93 · 148  
CMYK   100 · 37 · 0 · 42

**Blue tint**

Tags, chips, highlights.

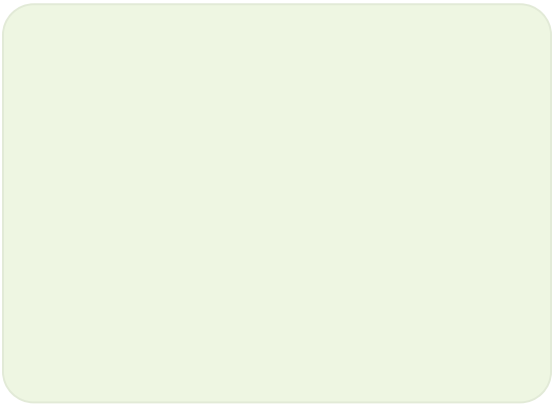

HEX    #E7F2FA  
RGB    231 · 242 · 250  
CMYK   8 · 3 · 0 · 2

**Text green**

Green text on light backgrounds, when essential.

HEX    #3F6A0F  
RGB    63 · 106 · 15  
CMYK   41 · 0 · 86 · 58

**Green tint**

Confirmation messages, highlights.

HEX    #EEF6E2  
RGB    238 · 246 · 226  
CMYK   3 · 0 · 8 · 4

**Error**

Form error messages only.

HEX    #B42318  
RGB    180 · 35 · 24  
CMYK   0 · 81 · 87 · 29

CMYK values are reference conversions: confirm them with the printer's colour profile. Pantone references are not defined yet.

COLOUR

# Tonal scales

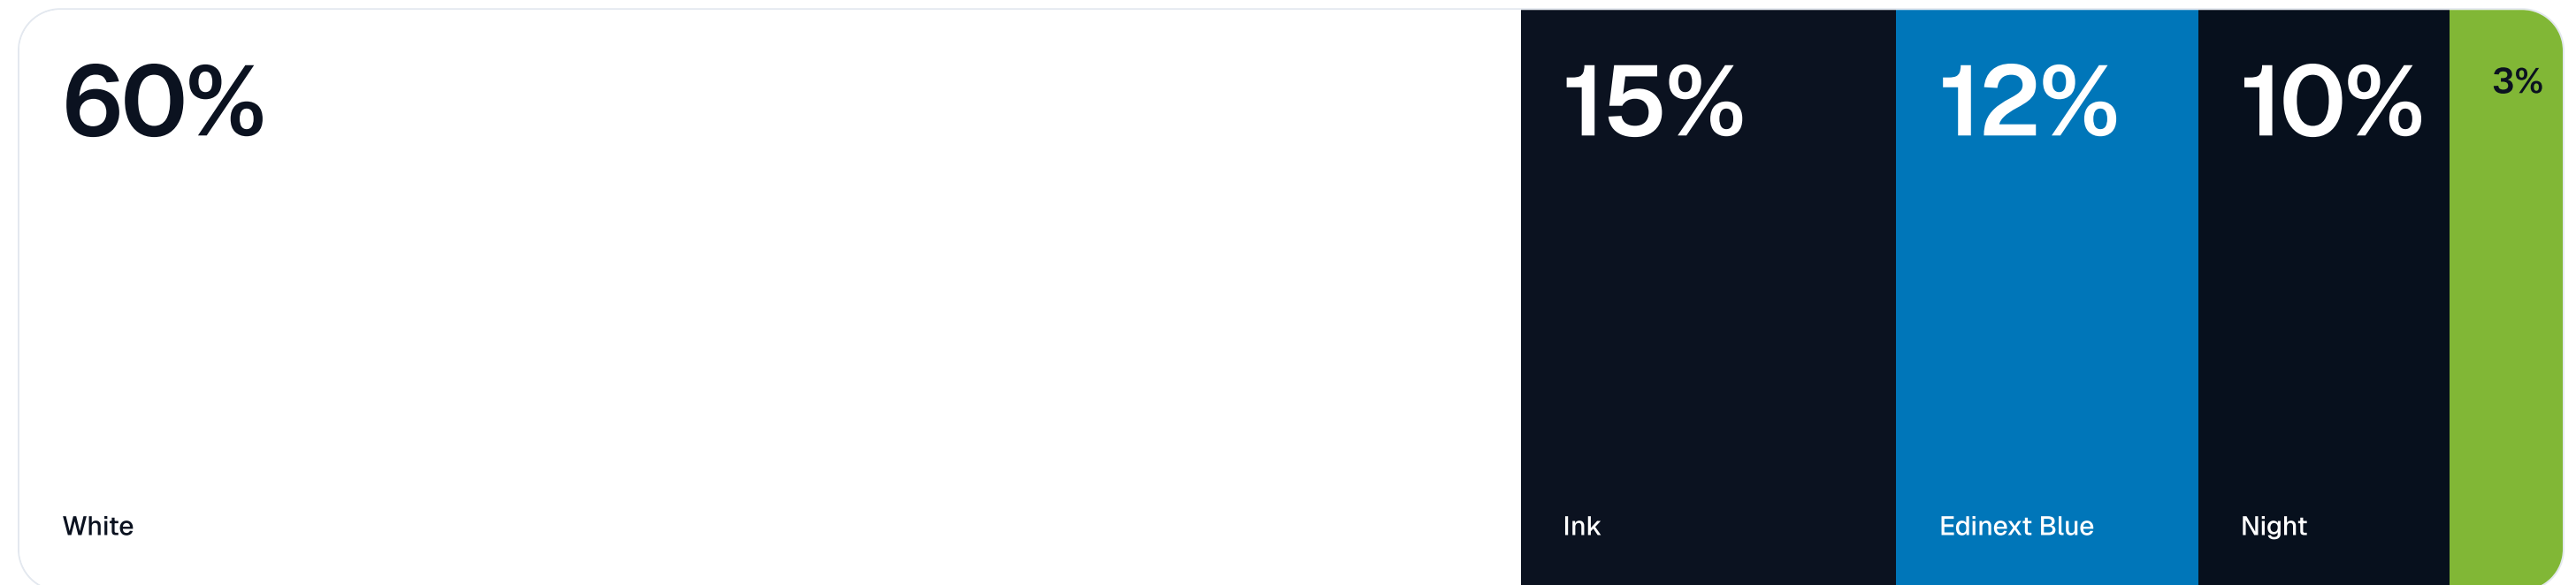

Scales from 50 to 900 for charts, diagrams and interfaces. Step 500 is always the brand colour.

## COLOUR

# Proportions

Indicative proportions in a typical layout: plenty of white, text in ink, blue as the brand colour and green as an accent.

COLOUR

# Combinations and contrast

Contrast ratios calculated according to WCAG 2.2. Body text needs at least AA (4.5:1).

|                                                                     |                                                                        |                                                                   |                                                                   |
